# Robinhood Became the Sacrificial Lamb Giving Citadel their Last Ounce of Air

# How Robinhood became the sacrificial lamb that has given Citadel their last ounce of air... MOASS begins when HOOD hits \$0 or files for bankruptcy...

Speculation / Opinion

I found a connection between Hood and GME... I believe, that Hood was added to the same short selling Algo. Those funds could be used to push GME lower, and once HOOD hits \$0... MOASS begins, and the market crashes for real...

On Sept. 15, 2008, **Lehman Brothers**, a well-known and respected investment bank, filed for bankruptcy protection after the Bush Administration's Treasury Secretary, Hank Paulson, refused to grant them a bailout.

If Robin Hood, was to file for bankruptcy, like Lehman Brothers - I would expect the markets to react in the same way, or more severe.

Robin Hood is the perfect scape goat. It can go to zero, you can Jail Vlad, and blame them for the crash..... Kenny walks free out the back door...

49 Lawsuits against RH.

Its the perfect short... Lets look at the chart...

But... around 11/11/2021, the volume really started to pick up...

Regular Volume was around 3-4 million. The volume is the right column.

Then... all of a sudden... the Volume on Hood went crazy...

So what else started happening around 11/11/2022

Not my "Stop Loss" its standard on Yahoo

GME started tanking like crazy.

So... If you look at the Volume on RH, it all of a sudden had an extra 10 million shares a day. At \$30 thats \$300,000,000.00 a day (\$30 X 10million).

Is it possible, that at some point, they decided to make Robin Hood the sacrificial lamb. They can short it for 10 million shares a day and no one is gonna care of question them going out. Most of the leadership sold their stock. The volume picks up the same time that GME starts to get shat on... It all seems to coincidental...

When Robin Hood does finally hit Zero, they are out of fresh cash, they dont have anything else to short - and then the squeeze is on -

**TLDR: Robinhood became the sacrificial lamb around 11/11/2021. They knew that company was going under and it was added to the same short selling algo as GME. They could be using that HOOD short sale money to push GME lower. When RH hits zero/files for bankruptcy, MOASS will start and mkt will collapse.**
